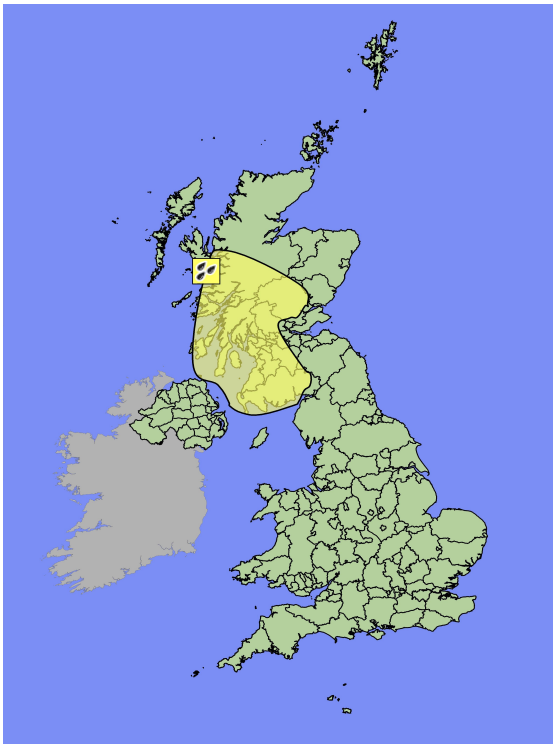
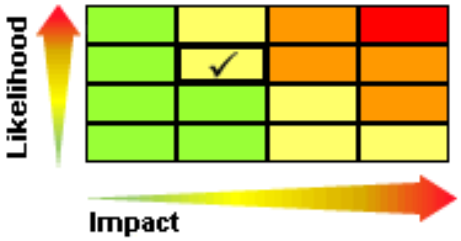
National Severe Weather Warning Service





Chief Forecasters Assessment
A further active frontal system is expected to move quickly northwards across Scotland during Tuesday morning. Following recent very wet weather the ground remains saturated meaning that a further 10-20 mm of rain could give rise to localised flooding. Winds will gust to around 50 mph, locally 60 mph in exposed places.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Tue, 20th Nov 2012** until **14:00 on Tue, 20th Nov 2012**

A further spell of rain is expected to move quickly northwards across Scotland during Tuesday morning. Following recent heavy rain across the south and west of Scotland the public should be aware that this may lead to localised flooding and possible disruption to transport. The rain will be accompanied by a strong and gusty southerly wind but should clear away northeast in the early afternoon.
